PROFESSIONAL SUMMARY

Full-Stack MERN Developer with 1.5+ years of experience building and maintaining scalable SaaS applications, e-commerce platforms, restaurant management systems, loyalty solutions, and AI-powered automation tools. Experienced in designing secure backend architectures, integrating third-party services, and delivering production-ready applications from development to deployment.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Redux, Context API, React Hooks, HTML5, CSS3, Tailwind CSS, JavaScript (ES6+)

AI & Automation: Claude API (Anthropic), MCP Server Integration, GitHub PR Automation, Prompt Engineering

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, bcrypt, Two-Factor Authentication (2FA), MVC Architecture, WebSockets

Databases: MongoDB, Mongoose, Firebase Firestore

Third-Party Integrations: Stripe Subscriptions, Cloudinary, SendGrid, HubSpot CRM, Calendly, Twilio

DevOps & Tools: Git, GitHub Actions, Vercel, Render, Postman, VS Code

PROFESSIONAL EXPERIENCE

MERN Stack Developer | Micro Data Tech Solutions | Lahore, Pakistan (2025 - Present)

- Built Venmor, a full-stack e-commerce platform for an online watch brand, including product catalog, cart, checkout flow, order management, and an admin dashboard using the MERN stack.
- Engineered secure payment flows and a dynamic product filtering system with search, category, and price-range capabilities for a smooth shopping experience.
- Created an AI-powered pull request review pipeline using Claude (Anthropic) via MCP server and GitHub webhooks, cutting code review turnaround from hours to minutes.
- Configured RESTful APIs with role-based access control separating customer-facing and admin routes, secured with JWT authentication.
- Optimized application performance through lazy loading, pagination, and efficient MongoDB indexing to handle a growing product inventory.
- Maintained clean Git workflows with feature branching and CI/CD pipelines to ensure stable, frequent deployments.
- Collaborated with UI/UX designers to deliver pixel-accurate, mobile-responsive interfaces aligned with brand identity.

MERN Stack Developer | TeamSevenSolutions | Lahore, Pakistan (2024 - 2025)

- Established secure authentication systems using JWT, bcrypt, and Two-Factor Authentication (2FA) to protect user accounts at scale.
- Architected scalable backend services using the MVC pattern, ensuring clean separation of concerns and long-term maintainability.
- Contributed to Table Ring, a SaaS restaurant table-management platform, delivering subscription handling, role-based access control, and real-time updates.
- Integrated Stripe for subscription billing, Cloudinary for media management, SendGrid for transactional email, and HubSpot for CRM automation and lead workflows.
- Built a Digital Loyalty Card SaaS module featuring QR-based customer identification, visit-based reward progression, point allocation, and discount redemption.
- Launched Astorian, a B2B lead-generation SaaS platform, including lead capture pipelines, CRM syncing, and Calendly integration for automated meeting scheduling.

- Built and maintained robust RESTful APIs with Node.js and Express, backed by MongoDB for dynamic and scalable data persistence.

PROJECTS

Automated PR Review Bot - *Claude AI, MCP Server, GitHub API, Node.js*

- Built an automated code review pipeline that triggers on pull request events via GitHub webhooks.
- Connected Claude (Anthropic) through an MCP server to analyze diffs, identify potential bugs, suggest improvements, and post structured review comments directly on GitHub PRs.
- Reduced average code review turnaround from hours to minutes while maintaining review quality across the team.

Venmor - Watch E-Commerce Platform - *MERN Stack, Stripe, Cloudinary, JWT | venmor.in*

- Developed and deployed a full-stack e-commerce platform for a premium watch brand featuring product management, secure checkout, and order tracking.
- Engineered a full-featured admin dashboard for managing products, inventory, orders, and customer data with role-based access control.
- Set up Stripe-based payment integration, Cloudinary for product image management, and SendGrid for order confirmation emails.
- Modeled a performant MongoDB schema with indexing for fast product search and filtering by brand, price, and category.

Table Ring - Restaurant Management SaaS - *MERN Stack, Stripe, Socket.io, Cloudinary*

- Created a SaaS platform for restaurant table management with real-time seat availability, multi-role dashboards, and Stripe-powered subscription tiers.
- Added WebSocket-based live updates so floor staff and managers see table status changes instantly without page refresh.

Astorian - Lead Generation Platform - *MERN Stack, HubSpot API, Calendly API*

- Built a B2B SaaS platform for automated lead capture, CRM pipeline syncing with HubSpot, and meeting scheduling via Calendly integration.
- Built webhook handlers to sync lead data bidirectionally between the platform and HubSpot in near real-time.

Digital Loyalty Card System - *MERN Stack, QR Code APIs*

- Created an end-to-end loyalty SaaS module with QR-based check-ins, automated reward point allocation, and tiered discount redemption logic.
- Structured the database schema to efficiently handle high-frequency customer visit events with aggregated reward calculations.

Cislou - Full-Stack Web Application - *Next.js, Node.js, MongoDB, Tailwind CSS | cislou.com*

- Developed and deployed a responsive full-stack application using Next.js with server-side rendering, secure authentication, protected routes, and role-based access control.

EDUCATION

Bachelor of Science in Information Technology (BSIT) - University of Education, Lahore, Pakistan
